

Invent a new animal that might live on our planet.

Produce it on paper with information or make one from clay, collage etc.

Write a poem about an animal - working with one, having one as a pet or seeing one when you are out.

Research one animal of your choice and produce an information poster. Label it with factual bullet points and boxes.

Maybe you'd like to do a maths project.

Make and board game such as Battleships or Snakes & Ladders.

Invent your own.

Numbers could be what you would find in the eg: 3 times table or add three throws together.

Science
If you're more into science, you might like to present some information about evolution, extinction or a specific type of habitat eg: African Savannah, Australian grasslands.

Maybe you'd like to interview someone who has animals. Record the interview and write it up with details of how to look after each type of animal. If you go to the zoo, you may like to speak to animal carers there.

How creative are you in 3D? Could you make a zoo? Card, paper, netting, wire... with plastic animals?

Apple Class Autumn Term Homework Choices

Dates for your calendar:

Please bring your first homework project in on Tuesday 30th October and the second piece on Wednesday 5th December.

Parents - you are all invited to come back into the classroom, after normal collection, to look at all of the homework pieces.
