## STRATEGY STATEMENT

At St Andrew's we have high aspirations and ambitions for our children and we believe that no child should be left behind. We are determined to ensure that our children are given every chance to realize their full potential and aspire to be the 'Be the Best You Can Be'. We are committed to meeting their pastoral, social and academic needs in a nurturing environment. As with every child in our care, a child who is entitled to the Pupil Premium Grant, is valued, respected and entitled to develop to his/her full potential, irrespective of disadvantage.

Our key objective in using the Pupil Premium Grant is to diminish the differences between pupil groups. As a school we consistently track all groups of pupils to ensure that they make good or better progress. Through targeted interventions, we are working to eliminate barriers to learning and progress. For new entrants that start with low attainment on entry, our aim is to ensure that they make accelerated progress in order to reach age related expectations as they move through the school. Once at age related expectations we always continue to extend that learning further to ensure that they reach higher levels of attainment. We closely monitor how we are spending the allocated funds to ensure they are having an impact on pupil premium pupil's achievement.

### **Identification, implementation and development of provision**

Academic intervention in addition to social, emotional and behavioural support are identified through half termly Pupil Progress Meetings. Analysis of tracking and progress is used as a vehicle to identify concerns and presenting issues and also as a measure of impact during the review process. In addition, the school regularly considers current provision available in school and seeks to expand the range of support on offer. This could be from training or by accessing external expertise. All PPG funded intervention and provision is assessed and evaluated to measure impact. Subsequently, activities are either maintained or modified for future implementation and any ineffective approaches are stopped.
